Patty suggested this also.

Monica, did Region 6 get the Tier II from the facility. I think the earlier news reports that listed the chemicals at the facility were incomplete as they didn't include the two regulated RMP facilities.

Thanks,

Kim

I guess the EPCRA Tier II forms would say what they actually have on site, but HQ does not have access to that info.

**Subject:** RE: Arkema product

So I am trying to reach Monica Smith, who, along with David Gray, appears to be taking the lead in R6 on answering the questions from Barry. I have exchanged brief emails with Monica but have been unable to reach her via her office or cell phone – probably because she and David are working energetically on this product. I have left messages and volunteered whatever help we can provide and asked that we (RID, CMAD and ERT) be in the loop to review any product before it is finalized. When they get a chance to breathe I am sure they'll bring us in the loop. In the meantime, I think any background research we can do to better understand the chemicals and risks associated with the facility would be beneficial. I will let you know if a call with R6 can be scheduled.

Jim
